

01 THE PROBLEM

Your staff isn't refusing AI.

They're just being told to use tools that aren't designed for them.

02 THE FIX

So we put it in a form they already know.

No login, no training, and no new habits to learn. They email Gofer like they would an intern.

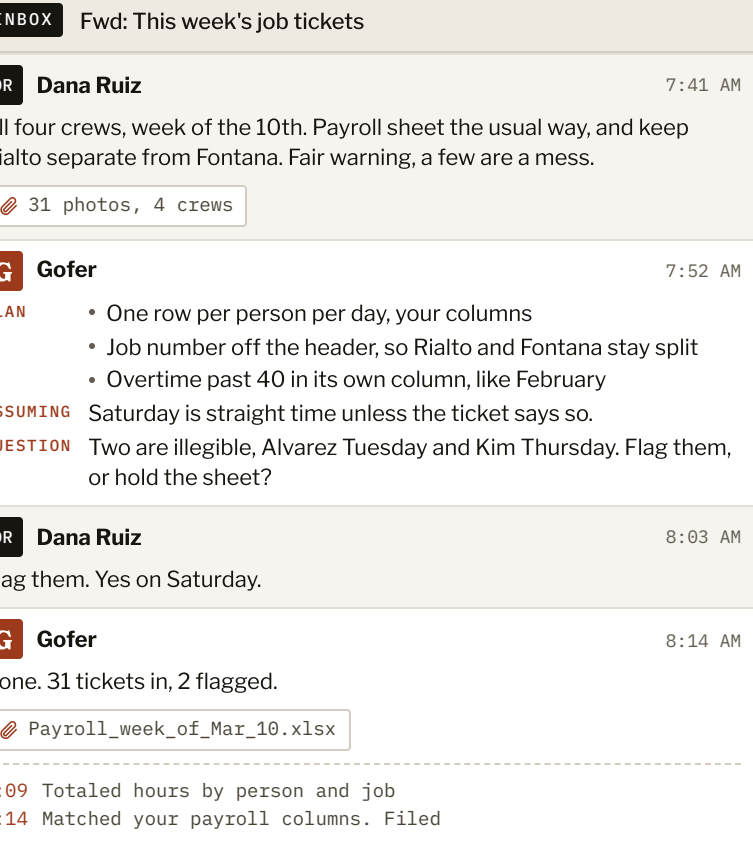

Work that used to take a script, a vendor, or a temp.

Gofer understands what you need. It learns as you use it and gets better at its job, but never asks for a promotion.

03 WHY ME

I've built gofers my whole career.

Twelve years as an engineer on RF and space hardware. Every job I had, I wrote scripts to take the grunt work off my plate. Gofer only wants to do the grunt work and fits into how people already work.

This doesn't replace your best people. It gives them a smart, personal intern so they can do more of what makes them great.

Peter Cho Founder, Gofer

01 THE GAP

Businesses aren't using AI. Their employees already are.

The people who won't touch the tool the company bought already use AI on their own.

U.S. Census Bureau BT05, May 2026 (AI used to produce goods or services). Gallup, May 2026, 22,573 U.S. employees.

<20%

of firms with four or fewer employees use AI. Among firms with 250 or more, it's 37%.

Use rose at firms with 20+ employees over the last six months. It **did not change** at firms under 20.

U.S. Census Bureau, Business Trends and Outlook Survey, Dec 2025 to May 2026

15%

of U.S. employees use AI at work every day. 30% use it a few times a week or more.

Only **47%** say their organization has integrated AI tools. **20%** aren't sure.

Gallup, May 6 to 20, 2026, 22,573 employed U.S. adults

02 THE REASON

It's a learning problem as much as a buying problem.

36%

of employees feel they've had adequate upskilling for AI. **66%** say they get limited or no guidance on how to use it.

BCG, AI at Work, June 2026, about 12,000 employees, managers and leaders

14%

of small businesses have AI embedded in their core operations, even though 76% use it somewhere.

73% say they'd benefit from more training and implementation help.

Goldman Sachs 10,000 Small Businesses Voices, Jan 27 to Feb 4, 2026, 1,256 owners, all 50 states

03 THE PRIZE

The grunt work is real, and it's measurable.

25hrs

a week spent on manual data entry and reconciling data across apps, per business.

Intuit QuickBooks Business Solutions Survey, Aug 2024, 630 U.S. businesses with 10 to 99 employees

54%

of small business owners say paperwork gets in the way of running the business. They average 11 hours a week on admin.

American Express and Small Business Saturday UK, SME Barometer, July 2026, 1,000 UK owners

Gofer doesn't ask your staff to learn a tool. It asks them to send an email.
